as a comparative study of the virtue ethics of aristotle and confucius this book explores how they each reflect upon human good and virtue out of their respective cultural assumptions conceptual frameworks and philosophical perspectives it does not simply take one side as a framework to understand the other rather it takes them as mirrors for each other and seeks to develop new readings and perspectives of both ethics that would be unattainable if each were studied on its own

mirrors for princes is a history of the business book predating modern leadership and management literature by thousands of years common to cultures throughout the world mirrors for princes as

this genre was known taught kings queens sultans and other rulers how to lead their subjects machiavelli's the prince and aristotle's tips for tyrants in the politics are but the best known examples often written for general audiences this literature also taught readers to copy the virtues of fabled leaders and to follow the lead of their own rulers after falling out of favor for the last two centuries the genre found new life in modern mirrors for managers which are riddled with the same self-serving clichés this book seeks to familiarize readers with the clichés of mirrors for princes so they can more easily recognize them in both academic and popular literature on leadership

the trilogy forms of representation in the aristotelian tradition investigates how aristotle and his ancient and medieval successors understood the relation between the external world and the human mind it gives an equal footing to the three most influential linguistic traditions greek latin and arabic and offers insightful interpretations of historical theories of perception dreaming and thinking this second volume focuses on dreaming and analyses some of the most prominent problems connected to dreams as representations the contributions in this volume address the core aristotelian texts and their reception up to and including contemporary scientific discourse on dreaming

in aristotle's gynecology mariska leunissen examines aristotle's methods for the establishment of gynecological facts within his natural science arguing that many of the gynecological phenomena at stake such as menstruation and the nature of menstrual blood the role of female pleasure during sex and women's experiences of erotic dreams and their knowledge of conception and their experiences of false pregnancy and childbirth were mostly for socio-cultural reasons not at all or not immediately accessible for a male natural scientific observer such as aristotle given this lack of immediate empirical evidence aristotle employed alternative methods for the establishment of facts such as relying on signs and circumstantial empirical evidence or using analogical and probabilistic reasoning and relied heavily on existing expert reports such as mainly early medical sources but also sometimes verbal reports from women themselves moreover aristotle used a secondary standard for testing the results of this inquiry namely one which he originally developed for investigations into physically remote meteorological and cosmological phenomena that are not apparent to observation and according to which statements of facts are credible if they are ontologically possible leunissen thus reconstructs aristotle's gynecology in the context of his commitments to empiricism and his scientific methods for the fact-establishing phase of natural science and elucidates the role his concepts of evidence credibility and signs play in his natural scientific research however through its focus on aristotle's use of gendered knowledge and his reconstruction of natural phenomena believed to be characteristic of women leunissen's book also offers a glimpse of the lived experiences and reproductive beliefs of women in ancient greece

through a close reading of rarely studied materials sergius koderá examines the contested position of the body in renaissance philosophy showing how abstract metaphysical ideas evolved in tandem with the creation of new metaphors that shaped the understanding of early modern political cultural and scientific practices the result is a new approach to the issues that describes the function of new technologies such as optics and distillation and their interaction with popular creeds such as witchcraft and folk medicine as well as their relationship to the newly discovered ancient greek and roman texts that captured the attention of renaissance intellectuals the text also investigates for the first time how some philosophers forged their original syntheses from newly available and

traditional materials in so doing these philosophers contributed in unexpected ways to the formation of new cultural practices practices that entailed largely unexplored conceptualisations of physical bodies but also linked inextricably to the formation of new and striking metaphors for the physical world

this book examines a widespread and often misunderstood doctrine within the medieval aristotelian tradition namely the inclusion of aristotle s rhetoric and poetics within the scope of the organon it studies this doctrine as presented by the islamic philosophers al fārābī avicenna and averroes from a purely philosophical perspective and argues that the logical construal of the arts of rhetoric and poetics is both interesting and illuminating the book begins by examining some prevalent misconceptions regarding the logical interpretation of the rhetoric and poetics chapter two considers the greek background of the doctrine first through an examination of the aristotelian divisions of the sciences and then through an examination of the beginnings of the logical classification of the rhetoric and poetics among the greek commentators from the school of alexandria the remainder of the work is devoted to a detailed consideration of the arabic philosophers development of the doctrine both their understanding of its general epistemological and logical underpinnings and their elaboration of the specific logical structures upon which poetical and rhetorical discourse is based consideration is also given to the relationship between contemporary philosophical views of rhetoric and poetics and the views of these medieval authors
